- Effective against Hepatitis A Virus (HAV)

PRODUCT DATA

Fragrance: Citrus
Form: Liquid
Color: Clear
pH: 11.7
Specific Gravity: 1.2
Flash Point: >201°F
Density: 8.38 lbs./gal.
Ingredients: Dimethyl benzyl ammonium chlorides, dimethyl ethylbenzyl ammonium chlorides

DIRECTIONS FOR USE

DISINFECTION, DEODORIZING AND CLEANING. Remove gross filth or heavy soil prior to application of the product. Hold container six to eight inches from surface to be treated. Spray area until it is covered with the solution. Allow product to penetrate and the surface to remain wet for 1 minute (for Bloodborne Pathogens: allow surface to remain wet for 1 minute for HIV-1, HBV, and HCV 1). No scrubbing is necessary. Wipe with a clean cloth or allow to air dry. The product will not leave grit or soap scum.

FULL PRODUCT DESCRIPTION

XPRESS Detergent Disinfectant is designed specifically as a general cleaner and disinfectant for use in homes, hospitals, nursing homes, patient rooms, operating rooms, ICU areas, shower rooms, locker rooms, public restrooms, schools, food processing plants, food service establishments (restaurants) (commercial kitchens), transportation terminals, office buildings, manufacturing facilities, lodging, retail businesses, veterinary clinics, pet shops, animal life science laboratories and athlete/recreational facilities where housekeeping is of prime importance in controlling the hazard of cross contamination. It is formulated to disinfect hard, non-porous, inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, glazed ceramic tile, plastic surfaces, chrome, brass, copper, laminated surfaces, baked enamel surfaces, bathrooms, shower stalls, bathtubs, and cabinets. For plastic and painted surfaces, spot test on an inconspicuous area before use. May be used in the kitchen on counters, sinks, appliances, and stovetops. A rinse with potable water is required for surfaces in direct contact with food. XPRESS Detergent Disinfectant deodorizes those areas that generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, basements, restrooms, and other areas that are prone to odors caused by microorganisms.
